

Career Opportunities

Senior Electrical Engineer

Fibertek has an immediate career opportunity available for a Senior Electrical Engineer (Analog) at its R&D location in Herndon, Virginia

Fibertek is an internationally recognized leader in the development of state-of-the-art laser and electro-optic solutions for the military, NASA and Aerospace markets. We specialize in the design, development and manufacture of advanced laser transmitter systems and sophisticated electro-optical sensors. Our over 30 years of industry knowledge and technical expertise has led to a successful history of technology and product deployments ranging from under-sea to deep space applications and covering the optical spectrum from the UV to mid-infrared.

Job Overview:

The Electrical Engineer will work on small teams to develop, test, and modify the electronic control systems for Fibertek's LASER and LIDAR systems. The engineer will perform a wide range of engineering tasks primarily involving circuit design, analysis, and documentation. The work will include board and system-level integration and test. The work load will at times include multiple concurrent projects, with a mix of small, quick-turn projects and larger, longer-term projects.

General Duties:

- Analog and mixed-signal circuit design
- Board and system level integration
- Testing/debugging and analysis
- Preparation of test reports, design documents and other documentation as necessary
- Participation in field tests and experiments

Qualifications:

- BSEE with 5-10 years of design experience
- Experience with DC power supply design
- Experience with analog driver circuitry
- Experience with integration, test, and troubleshooting
- Strong communication and documentation skills
- US citizenship required
- Bonus Qualifications:
 - Experience with low-level signal detection.
